

NNESL Instructions

NNESL will be using GotSoccer league scheduling software. This means there are a few new tools we like you to know. If at any time you need help, our office or GotSoccer will be available. In order to create a final schedule you, the club, will need to, create your club's fields in GotSoccer. The process is simple and should not take much time.

Creating / Editing Fields

In order for the GotSoccer system to properly assign fields to home and away teams, it must know the fields for each club. You will only have to do this one time, unless there are modifications to the field.

Please make sure you know:

- a) The field address as we hook up the address to Google maps
- b) The age groups you want to play on the field
- c) Any exceptions to play. (Days or times the field is closed)

Click on your **Club** tab, then the **Facilities** link on the gray menu bar. Click on the **Add Facility** link.

Map	Location / Number	Type	L	W	Cond.	Tourn	League	BB*	LAX*	SB*	T
	Cary A	Field	110	70		No	Yes	No	No	No	Nc
	Cary B	Field	110	70		No	Yes	No	No	No	Nc

Fill out the form as best you can. We suggest a minimum of

- 1) Location Name. This is the park, school or other name the facility is known by.
- 2) The field number. If you use numbers, please use *01* not *1*
- 3) Enter the approximate dimensions. It is not critical to have the exact dimensions.
- 4) Enter the address

- 5) If you know the latitude and longitude (most web enabled cell phones will give this information) please enter it as some addresses are hard to find using Google maps.
- 6) Press **Save**

The screenshot shows the GotSoccer.com website interface. The top navigation bar includes links for Home, Website, State (AK), Club, Referees, Registrar, and Training. Below this is a secondary navigation bar with links for Management, Coaches, Team Officials, Teams, Players, Programs, and Help. The main content area is titled 'Facility Info' and contains two main sections: 'Facility Information' and 'Facility Address'. The 'Facility Information' section includes fields for Type (Field), Location/Name (Washington Park), Number (01), and Size (L 110 X w 70). The 'Facility Address' section includes fields for Address (123 main St), City (Jacksonville), State (FL), ZipCode (32003), and Country (United States). There are also fields for Phone, Phone (2), Mobile Phone, and Fax. A 'Lighted Facility' checkbox is present. At the bottom of the form, there are 'Save' and 'Cancel' buttons. The 'Save' button is highlighted with a red box.

Once you press Save, additional tabs will appear.

Click on the Availability tab

- 1) Leave the field hours at the default hours.
- 2) Click on all the age groups that play on the field.
- 3) If this field is not available for this league (event) you can remove it from being accessed by the league.

If you want to upload a facility map or give directions you can do this on the Map& Direction tab. This is optional. The facility map must be a jpeg file and this will overwrite the link to Google maps. We suggest a better placement might be on your website.

If you have multiple fields at the same location you can use the “Copy” function to save some typing

- 1) When the system returns “Duplicate this field”, click **OK**
- 2) You will now be working on the duplicate, change the field name and or number and press **Save**.
